DETAILED ACTION

1. Claims 1-28 are pending and under consideration.

Priority

2. The priority statement at the beginning of the specification must be amended to update the status of all priority applications.
3. Assessment of the prior applications which are relied upon for an earlier effective filing date indicates that other than application 08/786,533, files 01/21/1997, do not disclose the use of IL-12 as an adjuvant. Therefore, the effective filing date for claims 1-10 is 01/21/1997.

Drawings

4. The drawings contain a graph labeled "Fig. 25". However, there is no Brief Description of the figure in the specification.
5. Figure 1 is objected to because the figure is labeled as "1a, 1b, 1c, and 1d" but the specification refers to "1A, 1B, 1C, and 1D".
6. Figure 8 and its Brief Description are objected to because the figure is labeled as "8a, 8b," but the rest of the specification refers to "8A, 8B".
7. Figure 13 is objected to because of improper handwritten labeling of the Figure.
8. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the

Art Unit: 1645

several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

9. The disclosure is objected to because of the following informalities:

Pages 14, line 6, contains underlining in improper handwritten form.

Page 15, lines 13-16, contain underlining in improper handwritten form.

Page 16, lines 9-10, contain underlining in improper handwritten form.

Page 17, lines 26-29, contain underlining in improper handwritten form.

Page 18, lines 9-14, contain underlining in improper in handwritten form.

Page 22, lines 5-7, contain underlining in improper in handwritten form.

Page 24, line 5, contains underlining in improper in handwritten form.

Page 87, line 11, to page 87, line 1, what is "afte^F^PB Zr"

Appropriate correction is required.

Double Patenting

10. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re*

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

11. Claims 6-10 and 17-28 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,752,993.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to identical methods using identical compositions.

12. Claims 1-5 and 11-16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,818,223.

Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to identical methods using identical compositions.

Conclusion

13. No claims are allowed.
